COUNT 1: INFRINGEMENT OF U.S. PATENT NO. 6,023,708

12. Good refers to and incorporates herein the allegations of Paragraphs 1-11 above.

13. Fixmo makes, uses, sells, offers for sale, exports, supplies, and/or distributes within and from the United States products and/or services that allow for over-the-air synchronization of data with smartphone and/or other devices (the "'708 Accused Products"). Among such products is Fixmo's SafeZone product, which Fixmo sells or offers to sell with its Sentinel and other products. In addition, Fixmo provides these products and/or services to distributors, resellers, developers and/or users.

14. Fixmo has been and is now directly infringing the '708 Patent in this District and elsewhere by making, using, offering for sale, selling, importing, exporting, supplying and/or distributing within, to, and/or from the United States the '708 Accused Products, in violation of 35 U.S.C. § 271(a). Alternatively, Fixmo has indirectly infringed one or more claims of the '708 Patent by inducing such use of the claimed methods and systems by its end user customers using the '708 Accused Products in violation of 35 U.S.C. § 271(b). Alternatively, Fixmo has

contributorily infringed one or more claims of the '708 Patent by providing the '708 Accused Products directly or by way of distributors and/or resellers to end users, who in turn combine the '708 Accused Products, which have no substantial non-infringing uses, with available hardware and/or software to infringe one or more claims of the '708 Patent in violation of 35 U.S.C. § 271(c). Alternatively, Fixmo has supplied in or from the United States the '708 Accused Products, which comprise all or a substantial portion of the components of the claims of the '708 Patent, where such components are uncombined in whole or in part, in such manner as to actively induce the combination of such components outside of the United States in a manner that would infringe the patent if such combination occurred within the United States, in violation of 35 U.S.C. § 271(f)(1). Alternatively, Fixmo has supplied in or from the United States the '708 Accused Products, uncombined in whole or in part, which products are especially made or especially adapted for use in practicing the claims of the '708 Patent and are not staple articles or commodities of commerce suitable for substantial noninfringing use, knowing that such component is so made or adapted and intending that such component will be combined outside of the United States in a manner that would infringe the patent if such combination occurred within the United States, in violation of 35 U.S.C. § 271(f)(2).

15. Good has provided notice of the '708 Patent to Fixmo.

16. Upon information and belief, Fixmo had and has knowledge of the '708 Patent, Fixmo has been and is aware of its infringement, and Fixmo's infringement has been and continues to be willful.

17. Good has been irreparably harmed by Fixmo's acts of infringement of the '708 Patent, and will continue to be harmed unless and until Fixmo's acts of infringement are enjoined and restrained by order of this Court. Good has no adequate remedy at law to redress Fixmo's

continuing acts of infringement. The hardships that would be imposed upon Fixmo by an injunction are less than those faced by Good should an injunction not issue. Furthermore, the public interest would be served by issuance of an injunction.

18. As a result of Fixmo's acts of infringement, Good has suffered and will continue to suffer damages in an amount to be proved at trial.

Alternatively, Fixmo has indirectly infringed one or more claims of the '192 Patent by inducing such use of the claimed methods and systems by its end user customers using the '192 Accused Products in violation of 35 U.S.C. § 271(b). Alternatively, Fixmo has contributorily infringed one or more claims of the '192 Patent by providing the '192 Accused Products directly or by way of distributors and/or resellers to end users, who in turn combine the '192 Accused Products, which have no substantial non-infringing uses, with available hardware and/or software to infringe one or more claims of the '192 Patent in violation of 35 U.S.C. §

271(c). Good has no adequate remedy at law to redress Fixmo's continuing acts of infringement. The hardships that would be imposed upon Fixmo by an injunction are less than those faced by Good should an injunction not issue. Furthermore, the public interest would be served by issuance of an injunction.
